CONTENTS

Volume 103, Number 1, November 16, 1981

AUTHOR INDEX, Volume 103, Number 1, November 16, 1981 ii
TETSUYA KAMATAKI, KAORI MAEDA, YASUSHI YAMAZOE, TSUNEJI NAGAI, and RYUICHI KATO. Partial Purification and Characterization of Cytochrome *P*-450 Responsible for the Occurrence of Sex Difference in Drug Metabolism in the Rat 1
I. D. ALGRANATI and SARA H. GOLDEMBERG. Initiation, Elongation and Termination of Polypeptide Synthesis in Cell-Free Systems from Polyamine-Deficient Bacteria 8
F. BESANCON, M. F. BOURGEADE, J. JUSTESEN, D. FERBUS, and M. N. THANG. Two Inducers of Cell Differentiation Enhance the 2′,5′-Oligoadenylate Synthetase Activity in MSV Transformed Cells 16
M. SHAHBAZ, L. AKIYAMA, and P. R. LE BRETON. Ultraviolet Photoelectron Studies of Methyl Substituted Crysenes 25
S. M. GHIASUDDIN and F. MATSUMURA. DDT Inhibition of Ca-Mg ATPase from Peripheral Nerves and Muscles of Lobster, *Homarus americanus* 31
EVE BARAK BRILES. Normal Glycosaminoglycan Production in a Galactosylation-Defective Lectin-Resistant CHO Cell Variant 38
HENRY DANIELSSON and KJELL WIKVALL. Evidence for a Specific Cytochrome *P*-450 with Short Half-Life Catalyzing 7α -Hydroxylation of Cholesterol 46
TIP W. LOO and P. D. BRAGG. The DCCD-Binding Polypeptide Alone Is Insufficient for Proton Translocation through F_0 in Membranes of *Escherichia coli* 52
T. WILLIAM HUTCHENS, FRANCIS S. MARKLAND, and EDWARD F. HAWKINS. Physicochemical Analysis of Reversible Molybdate Effects on Different Molecular Forms of Glucocorticoid Receptor 60
W. D. GATHMANN and DAVID AMINOFF. Steric Factors Involved in the Action of Glycosidases and Galactose Oxidase 68
MASAKO MORIKAWA, MICHIKO INOUE, TAKASHI KOJIMA, KAZUYUKI UCHIYAMA, and MINORU TSUBOI. Sex-Related Difference in the Effect of Aspirin on Prostaglandin Metabolism in Rat Platelet and Aorta 77
WILLIAM K. KAUFMANN and JEFFERY L. SCHWARTZ. Inhibition of Replicon Initiation by 12-O-Tetradecanoylphorbol-13-acetate 82
HIROSHI NARITA, SHIN-ICHI YANAGAWA, RYUZO SASAKI, and HIDEO CHIBA. Induction of 2,3-Bisphosphoglycerate Synthase in Friend Leukemia Cells 90
A. VARADI and L. PATTHY. Kringle 5 of Human Plasminogen Carries a Benzamidine-Binding Site 97
CYNTHIA H. ROBBINS, GISELA KRAMER, RUSSELL SANETO, BOYD HARDESTY, and HOWARD M. JOHNSON. Dissociation of Protein Kinase Activity and the Induction of the Antiviral State in a Cell Line Responsive to the Antiviral Effects of Interferon 103
JOAN Ll. VIVES-CORRONS, JOSEP M. JOU, ANNA ESTER, MARIA IBARS, JOSEP CARRERAS, RAMON BARTRONS, FERNANDO CLIMENT, and SANTIAGO GRISOLIA. Vandate Increases Oxygen Affinity and Affects Enzyme Activities and Membrane Properties of Erythrocytes 111
GRACE CHAO YEH and JAMES M. PHANG. The Stimulation of Purine Nucleotide Production by Pyrroline-5-carboxylic Acid in Human Erythrocytes 118
HEINZ BLACKHOLM and HEINZ FAULSTICH. Protection of One of the Two Reactive Thiol Groups in F-Actin by ATP and Phalloidin 125
NELSON DURAN, JAIME BAEZA, JUANITA FREER, JUAN E. BRUNET, GUSTAVO A. GONZALEZ, CARLOS P. SOTOMAYOR, and ADELAIDE FALJONI-ALARIO. Dimethyl Sulfoxide as Chemical and Biological Probe: Conformational Effect on Peroxidase Systems ... 131
S. LIEN and A. SAN PIETRO. Effect of Uncouplers on Anaerobic Adaptation of Hydrogenase Activity in *C. reinhardtii* 139
BJORN NICANDER and PETER REICHARD. Aphidicolin Sensitivity of Variant 3T6 Cells Selected for Changes in Ribonucleotide Reductase 148
TAIRO OSHIMA and MISAKO BABA. Occurrence of *sym*-Homospermidine in Extremely Thermophilic Bacteria 156
MARK I. DONNELLY and FRED C. HARTMAN. Inactivation of Ribulose Bisphosphate Carboxylase/Oxygenase from *Rhodospirillum rubrum* and Spinach with the New Affinity Label 2-Bromo-1,5-dihydroxy-3-pentanone 1,5-Bisphosphate 161
C. STUART BAXTER and LARRY A. FISH. Parallel Activities of Fatty Acid Methyl Esters and Analogous Phorbol Diesters toward Mouse Lymphocytes 168
G. GOGEL and AARON LEWIS. Effect of Iodination on the pK of Schiff Base Deprotonation and M_{412} Production in Purple Membrane 175
JOHN H. JOHNSON, A. LEWIS, and G. GOGEL. Kinetic Resonance Raman Spectroscopy of Carotenoids: A Sensitive Kinetic Monitor of Bacteriorhodopsin Mediated Membrane Potential Changes 182
DAVID A. BRASE. Studies on Brain Opiate Receptor Stability *in Vitro*: Inhibition of Opiate Receptor Binding by Adenosine-5′-Diphosphate 189
B. ELLIOT CHAM, P. OWENS, H. P. ROESER, T. GAFFNEY, and B. C. SHANLEY. Heterogeneity of Lipoprotein B 196
NAOKI WATANABE and JIM DRYSDALE. Natural Enrichment of Ferritin mRNA in mRNP Particles 207
R. E. HAUSMAN and S. G. VELLEMAN. Prostaglandin E_1 Receptors on Chick Embryo Myoblasts 213

CARL GRUNFELD, KATHLEEN L. BAIRD, and C. RONALD KAHN. Maintenance of 3T3-L1 Cells in Culture Media Containing Saturated Fatty Acids Decreases Insulin Binding and Insulin Action 219
T. F. P. MOLSKI, P. H. NACCACHE, P. BORGEAT, and R. I. SHA'AFI. Similarities in the Mechanisms by Which Formyl-methionyl-leucyl-phenylalanine, Arachidonic Acid and Leukotriene B, Increase Calcium and Sodium Influxes in Rabbit Neutrophils 227
JON P. DURKIN, ALTON L. BOYNTON, and JAMES F. WHITFIELD. The *src* Gene Product ($pp60^{src}$) of Avian Sarcoma Virus Rapidly Induces DNA Synthesis and Proliferation of Calcium-Deprived Rat Cells 233
S. ELKABES, M. FRIDKIN, and Y. KOCH. Studies on the Enzymic Degradation of Luteinizing Hormone Releasing Hormone by Rat Pituitary Plasma Membranes 240
ROBERT T. SU. Effect of 1,4-Dihydroxy-5,8-bis (2-(2-hydroxyethylamino)ethylamino)-9,10-anthracenedione dihydroxyanthraquinone) on the Replication of Simian Virus 40 Chromosome 249
BERND R. SEIZINGER, VOLKER HOLLT, and ALBERT HERZ. Immunoreactive Dynorphin in the Rat Adenohypophysis Consists Exclusively of 6000-Dalton Species 256
JAMES S. WOODS, RICHARD KARDISH, and BRUCE A. FOWLER. Studies on the Action of Porphyrinogenic Trace Metals on the Activity of Hepatic Uroporphyrinogen Decarboxylase ... 264
SHINGO HATA, TOKUZO NISHINO, MASAYUKI KOMORI, and HIROHIKO KATSUKI. Involvement of Cytochrome *P*-450 in Δ^{22}-Desaturation in Ergosterol Biosynthesis of Yeast 272
G. C. M. SELTEN, A. M. E. SELTEN-VERSTEEGEN, and S. H. YAP. Expression of Alpha-Fetoprotein and Albumin Genes in a Rat Hepatoma Cell Line SY/1/80: Evidence for the Need of Species Specific Serum Factors 278
P. ANDERTON, T. F. WILD, and G. ZWINGELSTEIN. Modification of the Fatty Acid Composition of Phospholipid in Measles Virus-Persistently Infected Cells 285
ANDRE HOOGEVEEN, ALESSANDRA d'AZZO, REINHARD BROSSMER, and HANS GALJAARD. Correction of Combined β -Galactosidase/Neuraminidase Deficiency in Human Fibroblasts 292
ROBERT BRASSEUR, ERIK GOORMAGHTIGH, and JEAN-MARIE RUYSSCHAERT. Theoretical Conformation Analysis of Phospholipid Bilayers 301
M. P. JACOB, G. BELLON, L. ROBERT, W. HORNEBECK, M. AYRAULT-JARRIER, J. BURDIN, and J. POLONOVSKI. Elastase-Type Activity Associated with High-Density Lipoproteins in Human Serum 311
DONELLA WILSON, JOHN P. DAVIDSON, and L. S. WILLIAMS. Anomalies in the Guanosine Polyphosphate Metabolism: Effect of the *hisU* Mutation 319
HIDEO KAWABE, YUKIO SUGIURA, and HISASHI TANAKA. ^{31}P and ^{17}O NMR of Mn(III)-Containing Acid Phosphatase: Evidence for Direct Metal–Phosphate Interaction and Oxygen Exchange from Water into Inorganic Phosphate 327
CATHERINE HEUSELE and MARIE-FRANCE CARLIER. GTPase Activity of the Tubulin–Colchicine in Relation with Tubulin–Tubulin Interactions 332
S. SAKAMOTO, M. SAKAMOTO, A. MATSUMOTO, M. NAGAYAMA, and M. J. GLIMCHER. Chick Bone Collagenase Inhibitor and Latency of Collagenase 339
LINDA W. DeLAP, ROBERTA K. BRABEC, ROBERT H. GRAY, and I. A. BERNSTEIN. Tonofilament Protein, a Keratin from Rat Epidermis 347
JUNJI NISHIMURA and THOMAS F. DEUEL. Stimulation of Protein Phosphorylation in Swiss Mouse 3T3 Cells by Human Platelet Derived Growth Factor 355
EMILE VAN SCHAFTINGEN, DEWI R. DAVIES, and HENRI-GERY HERS. Inactivation of Phosphofructokinase 2 by Cyclic AMP-Dependent Protein Kinase 362
LUIS O. BURZIO, LINO SAEZ, and RICARDO CORNEJO. Poly(ADP-ribose) Synthetase Activity in Rat Testis Mitochondria 369
ERRATUM. Volume 102, Number 2, September 30, 1981: Nancy H. Colburn and Thomas D. Gindhart, "Specific Binding of Transforming Growth Factor Correlates with Promotion of Anchorage Independence in EGF Receptorless Mouse JB6 Cells," pp. 799–807 376

Volume 103, Number 2, November 30, 1981

AUTHOR INDEX, Volume 103, Number 2, November 30, 1981 ii
A. J. POULOSE, LINDA ROGERS, and P. E. KOLATTUKUDY. Primary Structure of a Chymotryptic Peptide Containing the "Active Serine" of the Thioesterase Domain of Fatty Acid Synthase 377
J. JONGSTRA-BILEN, M. E. ITTEL, J. JONGSTRA, and P. MANDEL. Similarities in the Molecular Weight of Poly(ADPR) Polymerase from Different Tissues and Species 383
A. BOLLEN, C. GLINEUR, G. DELCUVE, R. LORIAU, and A. HERZOG. Expression in *Escherichia coli* of Urokinase Antigenic Determinants 391
MARY N. LEIDA, JOHN R. MAHONEY, and JOHN W. EATON. Intraerythrocytic Plasmodial Calcium Metabolism 402
JANICE E. EKHOLM, SHIVENDRA D. SHUKLA, and DONALD J. HANAHAN. Change in Cytosolic Calmodulin Activity of Density (Age) Separated Human Erythrocytes towards Membrane Ca^{2+}/Mg^{2+} ATPase 407
TAKASHI YAMAMOTO and ROY E. MC LAUGHLIN. Isolation of a Protein from the Parasporal Crystal of *Bacillus thuringiensis* var. *kurstaki* Toxic to the Mosquito Larva, *Aedes taeniorhynchus* 414
D. C. ANDERSON, STEVEN C. KING, and STANLEY M. PARSONS. Uncoupling of Acetylcholine Uptake from the *Torpedo* Cholinergic Synaptic Vesicle ATPase 422
DENNIS M. REINECKE and ROBERT S. BANDURSKI. Metabolic Conversion of ^{14}C-Indole-3-acetic Acid to ^{14}C-Oxindole-3-acetic Acid 429
JAMES A. BEGLEY, SUSAN M. HECKMAN, and CHARLES A. HALL. Hydrophobic Interactions of the APO and HOLO Forms of Human Cobalamin Binding Proteins 434

RACHID MAROUN and WAYNE L. MATTICE Solution Conformations of the Pituitary Opioid Peptide Dynorphin-(1–13) 442
E. L. R. STOKSTAD, ANN REISENAUER, J. E. WATSON, and GERHARD SCHLINGMANN. Folate Antagonists from a Crude "X-Methyl Folate" Preparation 447
YANAMANDRA GOPALAKRISHNA and NILIMA SARKAR. Selective Resistance of Bacterial Polyadenylate-Containing RNA to Hydrolysis by Guanosine 3′,5′-Monophosphate-Sensitive Nuclease of *Bacillus brevis* 454
CATHERINE DODE, ANNE THIESCE, DOMINIQUE LABIE, and JACQUES ELION. Isolation and Characterization of the Vitamin K Dependent Domain of Human Prothrombin .. 461
CAROLYN E. MOUNTFORD, KERRY T. HOLMES, and A. W. HAMPSON. Anti-Neuraminidase Antibodies: Which Substrate Should Be Used to Test Their Effect on Influenza Virus Neuraminidase 469
JERRY H. FISHMAN. Estradiol Binding in the Cytosol and Nuclear Pellet of Electrolytically Treated Rat Uteri 475
KENNETH J. ROTHSCHILD, MARK ZAGAESKI, and WILLIAM A. CONTORE. Conformational Changes of Bacteriorhodopsin Detected by Fourier Transform Infrared Difference Spectroscopy 483
M. A. DEUGNIER, X. ABLE, M. CARON, and J.-C. BISCONTE. Lateral Diffusion of Membrane D-Galactosyl Glycoconjugates of Differentiating Neuroblastoma Cells 490
M. K. MATHEW, A. RAVI, and P. BALARAM. Disulfide Luminescence. Emission Characteristics of Cyclic Tetrapeptide Disulfides 498
IRENE JOAB, GERARD REDEUILH, CLAUDE SECCO, CHRISTINE RADANYI, ETIENNE-EMILE BAULIEU, and HELENE RICHARD-FOY. Thermal Inactivation and Molecular Forms of the Estrogen Receptor: Effects of Molybdate 505
KAFAIT U. MALIK and PATRICK Y-K WONG. Leukotriene C_4: The Major Lipoxygenase Metabolite of Arachidonic Acid in Dog Spleen 511
E. C. HATCHIKIAN. A Cobalt Porphyrin Containing Protein Reducible by Hydrogenase Isolated from *Desulfovibrio desulfuricans* (Norway) 521
ROBERT S. MATSON and ARMAND J. FULCO. Hydroxystearates as Inhibitors of Palmitate Hydroxylation Catalyzed by the Cytochrome *P*-450 Monooxygenase from *Bacillus megaterium* 531
C. Y. LAI and B. DIETZSCHOLD. Amino Acid Composition and Terminal Sequence Analysis of the Rabies Virus Glycoprotein: Indentification of the Reading Frame on the cDNA Sequence .. 536
NED WATSON and DAVID APIRION. Ribonuclease F, a Putative Processing Endoribonuclease from *Escherichia coli* 543
J. T. O'FLAHERTY, M. J. HAMMETT, T. B. SHEWMAKE, ROBERT L. WYKLE, S. H. LOVE, C. E. MC CALL, and M. J. THOMAS. Evidence for 5,12-Dihydroxy-6,8,10,14-eicosatetraenoate as a Mediator of Human Neutrophil Aggregation 552
CHANDAN PRASAD and RUTH M. EDWARDS. Stimulation of Rat Pituitary Phospholipid Methyltransferase by Vasopressin but not Oxytocin 559
RICHARD A. MUMFORD, CECIL B. PICKETT, MORRIS ZIMMERMAN, and ARNOLD W. STRAUSS. Protease Activities Present in Wheat Germ and Rabbit Reticulocyte Lysates ... 565
TOSHIHO NISHITA and HAROLD F. DEUTSCH. Isolation of Equine Muscle Carbonic Anhydrase in Crystalline Form 573
PAUL R. ORTIZ DE MONTELLANO, KENT L. KUNZE, SUSAN P. C. COLE, and GERALD S. MARKS. Differential Inhibition of Hepatic Ferrochelatase by the Isomers of *N*-Ethylprotoporphyrin IX 581
CLAUDE BESMOND, RICHARD BENAROUS, and AXEL KAHN. Cell Free Synthesis of Human Prothrombin: Immunological Characterization of the Translation Product 587
MARIE-THERESE CHAUVET, JACQUELINE CHAUVET, and ROGER ACHER. Identification of Rat Neurophysins: Complete Amino Acid Sequences of MSEL- and VLDV-Neurophysins .. 595
HIROSHI KANAZAWA, TOSHIAKI KAYANO, KAZUNORI MABUCHI, and MASAMITSU FUTAI. Nucleotide Sequence of the Genes Coding for α, β, and γ Subunits of the Proton-Translocating ATPase of *Escherichia coli* 604
HIROSHI KANAZAWA, KAZUNORI MABUCHI, TOSHIAKI KAYANO, TAKATO NOUMI, TAKAO SEKIYA, and MASAMITSU FUTAI. Nucleotide Sequence of the Genes for F_0 Components of the Proton-Translocating ATPase from *Escherichia coli*: Prediction of the Primary Structure of F_0 Subunits 613
NARAYAN K. BHAT, BANAVADI G. NIRANJAN, and NARAYAN G. AVADHANI. The Complexity of Mitochondrial Translation Products in Mammalian Cells 621
PUSHKARAJ J. LAD, MARCIA A. LIEBEL, and ARNOLD A. WHITE. Activation of Rat Lung Soluble Guanylate Cyclase by Sodium Nitroprusside: Effects of Hemoglobin and Reducing Agents 629
B. STRULOVICI, Y. WEINSTEIN, and U. ZOR. Prevention of Prostaglandin E_2-Induced Desensitization of Rat Ovarian Cyclic AMP Response by Concanavalin A 638
DRAGINJA PERICIN, SVETLANA TRIVIC, and VLADIMIR LESKOVAC. Influence of Isoproterenol on Net Potassium Uptake in Whole Pigeon Erythrocytes *in Vitro* 647
JESSE BAUMGOLD, PAUL GALLANT, SUSUMU TERAKAWA, and HARISH PANT. Tetrodotoxin Affects Submembranous Cytoskeletal Proteins in Perfused Squid Giant Axons .. 653
KAZUEI IGARASHI, REIKO HONMA, HIROKO TOKUNO, MITSUKAZU KITADA, HARUO KITAGAWA, and SEIYU HIROSE. Effect of Polyamines on Prostaglandin Synthesis in Various Cell-Free Systems 659
JACQUES MEYER and JEAN-MARC MOULIS. Replacement of Sulfide by Selenide in the [4Fe–4S] Clusters of the Ferredoxin from *Clostridium pasteurianum* 667
ERNST-JURGEN SCHLAEGER: Nucleosome Assembly Capacity of Nuclear Lysate after Nuclease Digestion 674
GIOVANNI ALFREDO PUCA and VINCENZO SICA. Identification of Specific High Affinity Sites for the Estradiol Receptor in the Erythrocyte Cytoskeleton 682
MICHAEL G. CLARK, SALLY D. NEVILLE, and DALLAS G. CLARK. Adrenergic Regulation of Pyruvate Kinase and Gluconeogenesis in Hepatocytes from Phosphorylase Kinase-Deficient (*gsd/gsd*) Rats 690

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to emphasize clearly the novel aspects of the information reported.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover. To assist us in ensuring rapid processing of your article, please submit a signed photocopy of the copyright assignment form which appears as page 3 of this "Information" along with your manuscript. (This form will not be binding if your manuscript is not accepted for publication in BBRC.) *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5 × 11-in. high-quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation. **No changes may be made in manuscripts after acceptance.**

Manuscripts should be double-spaced on one side of the sheet; **methods, references, footnotes and figure legends should be single-spaced**. Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the IUPAC-IUB Document No. 1 (*Arch. Biochem. Biophys.* (1966) **115**, 1–12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be consistent with the form and style of the above document and **must be defined in a single footnote and typed on a separate page**, rather than in the text. Such abbreviations **must not** be used in the Summary.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g. ATPase). Use the Enzyme Commission ("EC") code number when available.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol of the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [^{32}P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the **Archives of Biochemistry and Biophysics** (1980) **199**, v-xxii. Reprints are available from the Publisher.

Footnotes, references, and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be clearly labeled in black ink in a manner suitable for direct reproduction (Leroy lettering size 120 or 140). Do not use press-on lettering: typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 × 8 in.); the original drawings should be no larger than 8.5 × 11 in.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index, 1969*. Note the following examples.

For a journal article:

1. Chattorai, D.K., and Bull, H.B. (1971) Arch. Biochem. Biophys. 142, 363-370.

For a book by one or more authors:

2. Robinson, G. A., Sutherland, E. W., and Butcher, E. (1971) Cyclic AMP, pp. 298-302, Academic Press, New York.

Note that inclusive pagination must be given.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms, with price lists, are sent to the authors immediately upon acceptance of their manuscript.

I hereby confirm the assignment of all copyrights in and to the manuscript named above in all forms and media to Academic Press effective if and when it is accepted for publication by Academic Press. (For U.S. government employee authors, this provision applies only to the extent to which copyright is transferable.) I also confirm that the manuscript contains no material the publication of which would violate any copyright or other personal or proprietary right of any person or entity, and I acknowledge that Academic Press is relying on this letter in publishing this manuscript.

_____ _____

Date Signed

_____

Name (and title if not author)

To be signed by at least one of the authors (who has obtained the assent of the others, if any). In the case of a "work made for hire" (a work prepared by an employee within the scope of his or her employment or commissioned as a work for hire under a written agreement), an authorized representative of the employer should sign.

Please note: Manuscripts cannot be processed for publication until the Publisher has received this signed form.

If the manuscript is not published by Academic Press, this letter will not take effect.

APL 1081

Proceedings of a Conference held 1–3 September 1980 in Grignon, France

Liposomes, Drugs and Immunocompetent Cell Functions

edited by Claude Nicolau and Alain Paraf

August/September 1981, xiv + 194pp., £14.00 (UK only) / $34.00, 0.12.518660.6

The book presents new results in the study of liposomes, some of their physico-chemical properties, their capacity to function as drug carriers *in vitro* and *in vivo*, carriers of genetic material. Advances in the design of liposomes appropriate for particular applications are reported as well as results concerning their latency and clearance *in vivo* and their possible targeting.

Rhône – Poulenc Round Table Conferences

The Future of Antibiotherapy and Antibiotic Research

edited by L. Ninet, P. E. Bost, O. H. Bouanchaud and J. Florent

July/August 1981, xx + 508pp., £25.00 (UK only) / $60.00, 0.12.519780.2

The purpose of the Rhône-Poulenc Round Table Conferences is to bring together a number of widely known scientists from universities and the pharmaceutical industry who are engaged in common research. The second conference was held in Paris in February 1980, and was an attempt to obtain a fully up-to-date assessment of the most important aspects of the use and development of antibacterial agents. Its proceedings are contained in the present book, which comprises 31 chapters by 44 leading experts.

Biological Techniques Series

Microelectrode Methods for Intracellular Recording and Ionphoresis

R.D. Purves

May 1981, x + 146pp., £9.80 (UK only) / $24.00, 0.12.567950.5

This book deals with the use of glass microelectrodes for measurement of cellular potentials and micro-application of drugs. The newcomer will find a wealth of practical advice on the choice of apparatus, making and filling electrodes, impalement of cells, and prevention of electrical or mechanical interference.

The MSH Peptides

A.J. Thody

1980, viii + 162pp., £16.80 (UK only) / $38.50, 0.12.687850.1

The book concentrates on MSH in mammals. While much still remains uncertain, it is in these higher vertebrates that the most recent advances concerning the MSH peptides have been made. The purpose of this book is not to provide an exhaustive compilation of all existing data, but rather to present a selective discussion of one particular aspect – the physiology of MSH.

Announcing the first volume in a new series:

SELECTED METHODS IN ENZYMOLOGY

SERIES EDITORS: SIDNEY P. COLOWICK AND NATHAN O. KAPLAN

Volume 1

RNA AND PROTEIN SYNTHESIS

EDITED BY KIVIE MOLDAVE

FROM THE FOREWORD: *The Methods in Enzymology* series, which was originally published as a four-volume treatise over 25 years ago, has now grown to over 80 volumes. It has become more and more difficult for an individual investigator to locate particular methods of interest, especially in rapidly developing fields in which pertinent information now appears in many volumes of the series. Although individual and cumulative indexes are provided, the task of information retrieval is still formidable. We have, therefore, undertaken to provide such investigators and their students with a single volume work in a given area of interest, compiled by selection of the most essential and widely used procedures published in volumes of *Methods of Enzymology* in that particular area. The aim is to permit the individual investigator or student to have conveniently at hand all of the basic methodology in that field at relatively low cost. The articles, which are selected by the editors in that area, will be unabridged. A new Subject Index will be prepared for each volume.

SECTION HEADINGS: Transfer RNA. Aminoacyl-tRNA Syntheses. Polypeptide Chain Initiation. Polypeptide Chain Elongation. Polypeptide Chain Termination. Ribosomes. Subject Index.

1981, 832 pp., $34.50 ISBN: 0-12-504180-2

CURRENT TOPICS IN CELLULAR REGULATION

EDITED BY BERNARD L. HORECKER AND EARL R. STADTMAN

Volume 18

BIOLOGICAL CYCLES

EDITED BY RONALD W. ESTABROOK AND PAUL SRERE

FROM THE PREFACE: This volume started as a simple tribute to Sir Hans Krebs in his eightieth anniversary year but grew to have a life and importance of its own. . . . On one level we had gathered a critical mass of many scientists who were responsible for the foundations of modern biochemistry-energy metabolism, metabolic pathways, enzymology, regulatory mechanisms—and for us who grew up in that era it was awesome. More importantly, all of these scientists have continued biochemical research and are still contributing important work at the frontiers of modern biomedical research. In addition, we included a preview into the area of major research which we believe will dominate the biochemical sciences of tomorrow—events of molecular biology, cellular communication, and the merging of cell structure to biochemical function.

1981, 592 pp., $59.50 ISBN: 0-12-152818-9

Continuation Orders authorize us to ship and bill each volume in a series, or "Advances" type publication automatically, immediately upon publication. This order will remain in effect until cancelled. Specify the volume number or title with which your order is to begin.

Send payment with order and save postage and handling.

Prices are in U.S. dollars and are subject to change without notice.

METHODS IN ENZYMOLOGY

EDITORS-IN-CHIEF: SIDNEY P. COLOWICK AND NATHAN O. KAPLAN

Volume 73

IMMUNOCHEMICAL TECHNIQUES / Part B

EDITED BY JOHN J. LANGONE AND HELEN VAN VUNAKIS

FROM THE PREFACE: This volume continues the coverage of general immunochemical techniques presented in Volume 70, Part A. The papers illustrate the ingenuity characteristic of workers who have adapted the antigen-antibody reaction to develop a variety of assays which are applicable to numerous biochemical and clinical problems. Sensitivity and specificity clearly are among the major advantages of immunoassay techniques. These properties make these methods useful for quantification and purification of antigens representing a wide variety of chemical structures and biological activities. Markers of high specific activity labeled with radionuclides, enzymes, fluorescent molecules, or other probes have played an important role in the development of immunochemical methods sensitive to the femtomole range or less.

SECTION HEADINGS: Production of Antibodies. Labeling of Antigens and Antibodies. Separation Techniques in Immunoassay. Immunoassay Methods for the Detection of Antigens and Antibodies: A. Immunoassay in Gels. B. Immunoassays Dependent on Radiolabeled Tracers. C. Immunoassays Dependent on Enzyme-Labeled Tracers. D. Immunoassay of Immunoglobulins. Author Index. Subject Index.

1981, 768 pp., $59.00 ISBN: 0-12-181973-6

Volume 74

IMMUNOCHEMICAL TECHNIQUES / Part C

EDITED BY JOHN J. LANGONE AND HELEN VAN VUNAKIS

SECTION HEADINGS: Immunoassay Methods for the Detection of Antigens and Antibodies: A. Fluorescence Immunoassay Methods. B. Immunoassays Dependent on Other Detection Methods. C. Use of Antibodies to Study Enzymes. D. Use of Antibodies to Study Receptors. Data Analysis. Immune Complexes. Author Index. Subject Index.

1981, 736 pp., $58.00 ISBN: 0-12-181974-4

Volume 75

CUMULATIVE SUBJECT INDEX

Volumes 30, 31, 33-60

EDITED BY MARTHA G. DENNIS AND EDWARD A. DENNIS

For easy retrieval of material, this computerized, cumulative index will supplement the Index Volume 33, which covers Volumes 1-30. A necessity for researchers in almost every scientific discipline.

1981, In preparation ISBN: 0-12-181975-2

Volume 76

HEMOGLOBINS

EDITED BY ERALDO ANTONINI, LUIGI ROSSI-BERNARDI, AND EMILIA CHIANCONE

FROM THE PREFACE: The aim of this volume . . . is to provide a compact collection of methods that are most widely used in hemoglobin research. Hemoglobin is the prototype of a functional protein. Fundamental aspects of the relationships between structure and function of proteins have been elucidated by studies in hemoglobin. Also, many of the methods applied to its study are widely employed in protein enzyme chemistry. These considerations and the important role played by hemoglobin and myoglobin in biochemistry, physiology, pathology, and clinical medicine should make this volume of value to researchers in many disciplines.

1981, 912 pp., $69.00 ISBN: 0-12-181976-0

PN 113003

Views on Food Science and Nutrition from Academic Press

From Biochemistry to Socioeconomics to Research Applications

CAROTENOIDS AS COLORANTS AND VITAMIN A PRECURSORS

Technological and Nutritional Applications

EDITED BY J. CHRISTOPHER BAUERNFEIND

A VOLUME IN THE FOOD SCIENCE AND TECHNOLOGY SERIES

Qualified authors have assembled existing knowledge of the application of carotenoids to food and to the feed of animals, fish, poultry, and birds. The use of carotenoids in medicine, in the coloring of pharmaceutical and cosmetic products, and their unique role as photoconductors are discussed. Analytical methodology is also covered. The chapters go beyond merely supplying approaches to application. For example, the volume illustrates the imperfect state of knowledge on the qualitative and quantitative distribution of carotenoids in natural foods, and calls for a renewed effort in applying modern analytical methodology to carotenoid determination in currently used cultivars of fruits, vegetables, and cereal grains, and in dairy, egg, fish, and poultry products.

CONTENTS: *J. C. Bauernfeind*, Natural Food Colors. *H. Klaüi and J. C. Bauernfeind*, Carotenoids as Food Colors. *W. L. Marusich and J. C. Bauernfeind*, Oxycarotenoids in Poultry Feed. *K. L. Simpson et al.*, Carotenoids in Fish Feeds. *A. H. Brush*, Carotenoids in Wild and Captive Birds. *J. C. Bauernfeind et al.*, Carotenes and Vitamin A Precursors in Animal Feed. *K. Münzel*, Carotenoids in Pharmaceutical and Cosmetic Products. *M. M. Mathews-Roth*, Carotenoids in Medical Applications. *J. O. Williams*, Carotenoids as Photoconductors. *E. De Ritter and A. E. Purcell*, Carotenoid Analytical Methods. Index.

1981, 924 pp., $95.00 ISBN: 0-12-082850-2

INFANT AND CHILD FEEDING

EDITED BY JENNY T. BOND, L. J. FILER, JR., GILBERT A. LEVEILLE, ANGUS THOMSON, AND WILLIAM B. WEIL, JR.

A VOLUME IN THE NUTRITION FOUNDATION MONOGRAPH SERIES

This book provides an authoritative examination of documented considerations basic to infant and child feeding practices, and to the identification of new areas of research and planning. More than 40 internationally recognized experts have contributed well-referenced, critical reviews that cover a wide range of subjects from the history of infant and child feeding: the composition of human milk; modified milks and formulas; the physiology of lactation; the use of supplemental and transitional foodstuffs; and special problems in industrialized and/or developing societies. The book also covers beliefs, sociocultural influences, socioeconomic and political matters, the nutrient requirements of infants and young children, and the influence of development processes, including taste.

SECTION HEADINGS: Introduction. Present Knowledge of Lactation and Human Milk. Development and Nutritional Quality of Infant Food. Are Our Infants and Children Well Nourished? Selected Perspectives. Infant and Child Feeding Practices in Today's World. Nutritional Requirements during Pregnancy and Lactation and of Infants and Young Children. Current Issues in Feeding the Infant and Young Child. Future Trends, Research, and Development. Index.

1981, 494 pp., $49.50 ISBN: 0-12-113350-8

BIOCHEMISTRY OF TASTE AND OLFACTION

EDITED BY ROBERT H. CAGAN AND MORLEY R. KARE

A VOLUME IN THE NUTRITION FOUNDATION MONOGRAPH SERIES

This comprehensive treatise contains studies of current biochemical knowledge of taste and olfaction. The volume critically assesses the existing data base in relation to current theories and looks ahead to potentially fruitful areas of research. The authors emphasize contributions from their laboratories, and place them within the context of related research. The book also presents informative overlaps of different interpretations of the same data base. Biochemical mechanisms at the peripheral receptor level are treated. The role of the cell surface is emphasized, although much remains to be learned of the specific chemical nature of receptor molecules. Transduction events coupled to the initial interaction are discussed, and the possible importance of such factors as cooperative interactions within receptor macromolecules and ion fluxes across membranes and within cells are described. The book presents neurotransmitters and other neurochemical aspects of the olfactory system. A selection of examples of analogous chemical sensory systems concludes the volume and serves as a reference point and as an aspiration for the field of taste and olfaction.

SECTION HEADINGS: Olfactory Receptor Mechanisms. Taste Receptor Mechanisms. Physicochemistry and Transduction. Neurotransmitters in Taste and Olfaction. Analogous Chemoreceptors. Index.

1981, 528 pp., $38.50 ISBN: 0-12-154450-8

Send payment with order and save postage and handling.
Prices are in U.S. dollars and are subject to change without notice.

Continuation Orders authorize us to ship and bill each volume in a series, or "Advances" type publication automatically, immediately upon publication. This order will remain in effect until cancelled. Specify the volume number or title with which your order is to begin.
